United States Department of Agriculture,

DIVISION OF STATISTICS.

U. S. DEPARTMENT OF AGRICULTURE,
OFFICE OF THE STATISTICIAN,
Washington, D. C., June 28, 1900.

SIR: I have the honor to transmit herewith a list of free employment agencies and other institutions and individuals willing to act as such, which are likely to be able to furnish laborers, domestic servants, and other persons for temporary or permanent employment on farms, and I respectfully recommend the publication of such list as Circular No. 13, Division of Statistics.

In the preparation of this list, which has been under the immediate direction of Dr. Max West of this office, the Statistician has been in correspondence with about 3,000 educational and philanthropic institutions, and of this number about 1,000 have, through their officers, not only consented to the publication of their names in the list, but have designated persons to answer correspondence relative to employment on farms and to have general charge of all matters connected therewith.

Thousands of complaints as to the scarcity of farm labor have been received by the Statistician within the last two years, and it is believed that the publication of this list will serve the twofold purpose of assisting farmers in obtaining much-needed help and of enabling many deserving persons to secure employment.

Respectfully,

JOHN HYDE, *Statistician.*

Hon. JAMES WILSON,
Secretary of Agriculture.

LIST OF FREE EMPLOYMENT AGENCIES FOR THE USE OF FARMERS.

EXPLANATORY NOTE.

On the following pages will be found a list of free employment agencies, and other institutions and individuals willing to act as such, which are likely to be able to supply farm laborers, domestic servants, or other employees for permanent or temporary employment in the country. The list includes the public employment offices maintained by some of the States, a large number of private or philanthropic employment bureaus which make no charge for their services, and a still larger number of institutions and associations which, without professing to maintain regular employment bureaus, are often able to

bring together would-be employers and employees. Among other institutions of this kind there are several hundred colleges, normal schools, and other educational institutions, including a number of agricultural colleges and other schools giving practical agricultural training and in some cases domestic training for young women as well.

In compiling the list circular letters were sent to about 3,000 addresses, and the names are now published of those whose replies indicate that they are in a position to know of persons seeking employment and willing to go into the country, and that they are willing to cooperate with the Department by acting as intermediaries between employing farmers and workers desiring employment. A very large majority of the replies received were favorable, but a majority of the persons addressed failed to reply at all. The net result is a list of nearly 1,000 names. For greater convenience of reference a separate list is made of agencies supplying domestic servants free of charge, although this involves the repetition of many names and addresses. Suggestive extracts from many of the replies are given.

The list is published for the convenience of farmers who may wish to employ agricultural or other workers. Except in the short supplementary list for domestic servants, the names are arranged by States and counties, to enable intending employers to find the addresses most convenient to their places of residence or business. When a farmer wishes to employ additional help for the summer season, and finds no address given for his own county or any of the surrounding counties, he will do well to correspond with one of the nearest colleges, as some of the students desiring employment may reside nearer than the college itself. Farmers in need of skilled agricultural labor of a high grade will usually be able to employ thoroughly trained men by applying to some of the agricultural colleges, and boys who have had some training in agriculture may often be secured from industrial schools of lower grade.

Whenever an intending employer writes to one of these agencies for help a stamp or stamped and addressed envelope should be inclosed for reply, except in the cases of United States officials in the immigration and Indian-school service, who have the franking privilege. Persons failing to receive any response from the agencies addressed, where this condition has been complied with, are requested to notify the Statistician of the Department of Agriculture.

This list will be sent not only to farmers, but also to a large number of philanthropic institutions besides those whose addresses are printed, in the hope that they will be able to refer applicants for charity to agencies through which employment may be secured.

If any persons or institutions whose names should be included in this list have been omitted, they will confer a favor upon the Depart-

ment and a benefit upon possible employers and employees by sending in their names for publication in future editions of the list.

EMPLOYMENT AGENCIES SUPPLYING FARM WORKERS.

ALABAMA.

Dallas County.—President C. S. Dinkins, Alabama Baptist Colored University, Selma, Ala.

Elmore County.—Mr. Clinton J. Calloway, Principal Kowaliga Academic and Industrial Institute (colored), Kowaliga, Ala.

We have our school year divided so as to enable our students to be on the farms during the busy parts of the year among farmers. School opens about November 1 and closes about the last of April; then two months vacation, and school opens again about the first of July and closes the last of August.

Hale County.—President S. M. Hosmer, Southern University, Greensboro, Ala.

Lee County.—President Wm. LeRoy Broun, Alabama Polytechnic Institute, Auburn, Ala.

This college has among its students many who would gladly accept temporary employment during vacation.

Macon County.—Geo. W. Carver, Director Department of Agriculture and Experiment Station, Tuskegee Normal and Industrial Institute (colored), Tuskegee, Ala.

Madison County.—President W. H. Council, Agricultural and Mechanical College (colored), Normal, Ala.

We find it quite difficult to get positions for our undergraduates during vacation, although each year we send out scores of letters seeking employment for them. Many of our students are good farmers and farm hands, as well as skilled mechanics and competent domestics.

Mobile County.—A. T. Burnell, Principal Emerson Institute, Mobile, Ala.

Montgomery County.—G. M. Noble, State Normal School for Colored Students, Montgomery, Ala.

We have a considerable number who desire work for the summer.

ARIZONA.

Apache County.—C. H. Lamar, Supt. Navajo Boarding School, via Ft. Defiance, Ariz.

There is a large number of Navajo Indians on this reservation who frequently go considerable distances to engage in various lines of labor. These people are good workers as a rule, and they need help of the proper kind.

Coconino County.—J. H. Bratley, Supt. Indian School, Supai, Ariz.

Maricopa County.—S. M. McCowan, Supt. Indian School, Phoenix, Ariz.

Pinal County.—D. D. McArthur, Supt. Pima Boarding School, Sacaton, Ariz.

Yuma County.—W. R. Bacon, Supt. Colorado River Boarding School, Parker, Ariz.

I have some large Indian boys at my school, who, I think, would make good assistants on the farm, and I would like very much to give them an opportunity to become such assistants, both for the opportunity it would afford them of earning a little money and for the civilizing effect such employment would have upon them.

CALIFORNIA.

Alameda County.—Appointment Secretary University of California, Berkeley, Cal.
Miss Katherine Felton, Supt. Associated Charities, 1265 Franklin St., Oakland, Cal.

I believe that we are in a position to know of persons desiring temporary work in the country; and that if it were understood that application for such help would be made to us, more persons looking for work would report at this office. It sometimes happens that women with children apply to us, and I feel sure that a number of country homes would be open to them if we only knew just where to look. We find, as I think all charity offices do, a reluctance on the part of applicants toward going into the country; but if we knew of good places open to them we could bring powerful pressure to bear to overcome this reluctance.

Miss Alice F. Coburn, Head Worker, Oakland Social Settlement, 1020 3rd St., Oakland, Cal.

The Indians residing in this county (Modoc) are expert hay stackers, and are employed in preference to white men.

Riverside County.—Harwood Hall, Supt. Indian School, Perris, Cal.

The larger pupils of this school have for years gone into positions every spring—the boys as farmers, gardeners, helpers in orchards, and in irrigating; the girls into homes as cooks, maids, nurses, etc. While they can remain away from the school duties but five or six months, they give such satisfaction that the demand for that class of help is more than we can supply.

We have helped many men to secure good places, especially in the winter season, when the orange crop is picked and when packing and shipping is pushed.

We procured in the year 1898 160 farm hands. We could have found well-paid places for a much greater number, but we found that our people prefer any kind of other work, and it is getting from year to year more difficult to induce our people to work on farms. I studied this question and found that in many cases the farm hands have been overworked, received a very poor nourishment, and sometimes had trouble to get their wages.
